1. Introduction
This manual provides important information for the safe and proper use of the generator. Please read this manual carefully before using the generator and keep it for future reference.

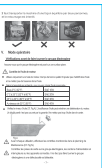

2. Safety
Read and understand all safety instructions before using the generator. Failure to follow these instructions may result in injury or property damage.

3. Features
The generator features a compact design, easy start, and a built-in fuel tank. It is suitable for use in various outdoor settings.

4. Specifications
Rated Power: 3000W
Starting Power: 4000W
Fuel Capacity: 25L
Runtime: 8 hours (at 50% load)

Table with 2 columns: Specification, Value. Includes rows for Rated Power, Starting Power, Fuel Capacity, and Runtime.

Table with 2 columns: Specification, Value. Includes rows for Dimensions, Weight, and Noise Level.

5. Operation
5.1 Starting the Generator
5.2 Running the Generator
5.3 Shutting Down the Generator

6. Maintenance
6.1 Oil Change
6.2 Air Filter Cleaning
6.3 Fuel System Maintenance

Table with 2 columns: Component, Maintenance Interval. Lists oil, air filter, and fuel system with their respective service intervals.

Table with 2 columns: Appliance, Power Requirement. Lists common household appliances and their power needs.

Table with 2 columns: Appliance, Power Requirement. Lists common household appliances and their power needs.

7. Troubleshooting
7.1 No Power
7.2 Low Output
7.3 Overheating

8. Appendix
8.1 Safety Precautions
8.2 Warranty Information

Table with 2 columns: Item, Description. Lists accessories and optional equipment.
